

# Backend tests - JUnit / Cucumber UT + IT + ArchTests + BDD

```
$/mvnw verify
```

```
Feature: User management
```

```
    Scenario: Retrieve administrator user
```

```
        When I search user 'admin'
```

```
        Then the user is found
```

```
        And his last name is 'Administrator'
```
